DETAILED ACTION

Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species-I: Figures 22-26, 33-35;

Flower pot cover with an integral skirt portion.

Species-II: Figures 27-28;

Flower pot cover with a skirt portion extending from
the outer surface of the base portion.

Species-III: Figures 29-30;

Flower pot cover with a skirt portion extending from
the inner surface of the base portion.

Species-IV: Figures 31-32;

Flower pot cover with a skirt portion extending from
the inner and outer surfaces of the base portion.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Furthermore, with the election of a single disclosed species (I-IV), as from the broad outline above, Applicant is required to ultimately elect a species combination as further defined, to include an election additionally from each of species A-C as outlined below. For example: Species II, A1, B4 and C2.

Species A: Base bottom configurations.

A1: Closed bottom; Figures 24,28,30,32,33

A2: Open bottom; Not depicted

A3: Partially open bottom; Figures 23,27,29,31

Species B. Decorative ornamentation (not depicted).

B1: Printed

B2: Embossed

B3: Etched

B4: Molded texture

Species C. Sleeve portions (not depicted) as typified by claims 43-50.

Art Unit: 3644

Applicant is advised that a reply to this requirement must include an identification of the species combination (i.e. Species I, A1, B1 and C3 for example) that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 3644

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
